Arrays and Strings: Is Unique

yusufakgull

Knowledge

- The standard ascii table has 128 characters.

- Extended ascii table has 256 characters.

- In ascii table; 65-90 : A-Z and 97-122 ; a-z and a-A = 32.

- Unicode is a superset of ASCII, and the numbers 0–127 have the same meaning in ASCII as they have in Unicode.

- ASCII uses an 8-bit encoding while Unicode uses a variable bit encoding.
